Worksheet 5: Monitoring

18.05.2010, Garching

Due 01.06.2010

1 Monitoring setup (lab task)

Discuss possible ways to set up the monitoring in the honeynet. Think of appropriate tools and how they can work together efficiently.

2 Configuring the monitoring (homework)

Configure the monitoring according to the results of the discussion in class. Use a virtual machine on your lab PC to complete this task. This virtual machine should run Debian 5.0 as operating system.

Going through the tutorial at http://www-scf.usc.edu/~csci530l/instructions/lab-ids-instructions.htm might be helpful for you.
