Worksheet 2: Honeypot configuration proposal

27.10.2009, Garching

Due 03.11.2009

1 Honeynet Architecture (lab task)

Discuss your architecture proposal with the group.

2 OS & services (lab task & homework)

Choose your operating system and the services you want to offer on your honeypot and discuss your decisions with the group. (lab)

Write a short proposal containing the details. (home)

3 Vulnerabilities and threats (homework)

Research known vulnerabilities to your OS and service(s) and add a short overview of weaknesses and known threats to your proposal assigned in homework. Be prepared to discuss your decisions and tell us about possible attacks on your honeypot.
